PROFESSIONAL SUMMARY

Passionate Computer Science and Engineering (Business Systems) undergraduate at VIT Vellore with a strong interest in Full-Stack Development, Machine Learning, and Business & Operations Management. Experienced in developing AI-powered applications, data-driven solutions, and scalable web applications using Java, React.js, Node.js, SQL, and Python. Possess a strong understanding of business operations, marketing, service management, and process optimization, with the ability to bridge technology and business requirements. Strong problem-solving, analytical, communication, and management skills, with a passion for leveraging technology and data to improve operational efficiency, enhance customer experiences, and deliver innovative, user-centric solutions.

EDUCATION

Vellore Institute of Technology (VIT), Vellore
B.Tech Computer Science and Engineering (Business Systems)

Aug 2023 - Present

CGPA: 7.32 / 10

Government Model Higher Secondary School, Karimangalam
State Board

2022 - 2023

Percentage: 90.5%

TECHNICAL SKILLS

- **Programming Languages:** Java, R (Basics)
- **Frameworks & Libraries:** React.js, Node.js
- **Developer Tools:** Git, GitHub, Visual Studio Code
- **Databases:** MySQL, MongoDB
- **Relevant Coursework:** DSA, OOP, Marketing Management, Service Management
- **Soft Skills:** Problem Solving, Logical Thinking

PROJECTS

MedCare ([Link](#)) - Healthcare Management System | React.js | Node.js | Express.js | MongoDB

- Developed a supply chain decision-support system for demand forecasting, inventory positioning, and replenishment planning to optimize stock availability.
- Implemented safety stock, lead-time demand, reorder point logic, and FEFO-based expiry management to reduce stockouts and minimize wastage.
- Integrated supplier replenishment, inventory transfers, and supply-chain monitoring features to support efficient distribution and data-driven decision-making.

Financial Time Series Forecasting Using Machine Learning - Python | Pandas | NumPy | Jupyter Notebook

- Built predictive models for forecasting stock market trends using historical financial datasets.
- Performed preprocessing, feature engineering, and trend analysis.
- Evaluated forecasting performance using regression models.
- Generated insights to support financial decision-making.

Pro Space - Professional Networking & Portfolio Platform - React.js | Node.js | Express.js | MongoDB

- Developed a responsive full-stack web application using the MERN stack with secure user authentication and role-based access control.
- Designed and implemented RESTful APIs with MongoDB integration to enable efficient data management and seamless frontend-backend communication.
- Built an intuitive React.js user interface and utilized Git/GitHub for version control, ensuring a smooth user experience and collaborative development.

ACHIEVEMENTS

- Awarded **100% Tuition Fee Scholarship** under the **VIT STARS Scheme (2023-2027)**.
- Secured **District 1st Rank** in Higher Secondary Education among Government School students.
- Consistently maintained good academic performance at VIT.
- Solved 170+ Problems in Leetcode([Link](#))
